From Tea to Treatment, a preliminary investigation into epigallocatechin gallate (EGCG) and its potential involvement in minimising the metabolic changes in cancer

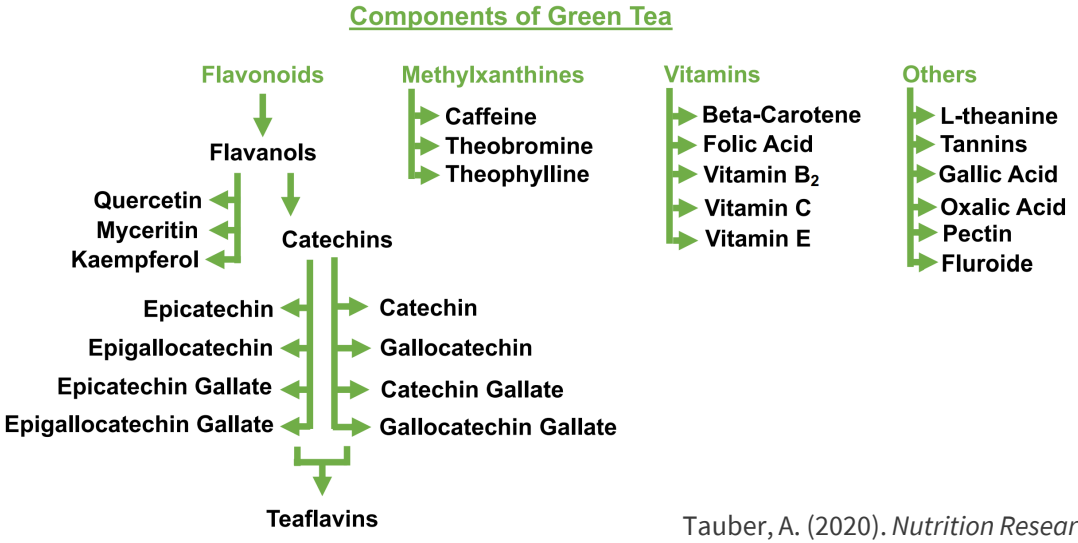
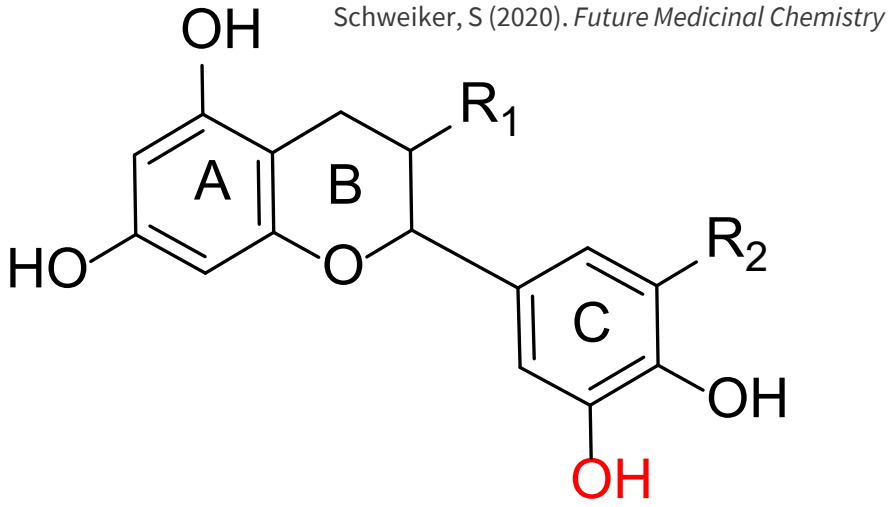
Amanda L. Tauber, Stephanie S. Schweiker and Stephan M. Levonis.



Tauber, A. (2020). *Nutrition Research*



Schweiker, S (2020). *Future Medicinal Chemistry*

Despite the current limitations, synthetic adaptations of green tea's catechin **EGCG** may aid in improving the tolerability of chemotherapeutic treatments.
